PROJECTS

STOREiT

Launched June 2022

<https://goinventory3337.herokuapp.com/>

- **Description** : STOREiT built with MERN stack leveraging Redux/@Redux/toolkit to keep database and UI in sync. **Grant access to authorized users**. This means that users must first meet certain conditions before accessing that specific route. Users can create an online inventory store and help them to Track, Update and Delete products from the inventory, in order to use the app you must be Logged in (or Register if you don't have an account)
- **Tools/Language used**: React, Node, Express, MongoDB, Mongoose, Redux/@Redux/toolkit

Next Shop

Launched August 2022

<https://next-ecommerce-blue.vercel.app/>

- **Description** : This is a project with the object to develop a basic website where a consumer is provided with a shopping cart application and also to know about the technologies used to develop such an application
- PayPal developer api to make online payment
- **Tools/Language used** : Next, Node, Express, MongoDB, Mongoose, Redux

The-Tech-Blog

Launched January 2022

<https://thetechblog33.herokuapp.com/>

- **Description** : Community Blog site where users can create and read tech related blog posts.
- Utilizes operations to allow users to Create/Update/Delete posts of their own as well as read and leave comments on other user's posts
- **Tools/Language used**: JavaScript, Handlebars, CSS, HTML, MySQL, Sequelize, Express
